

Asset Management Solution

InnoVergent Solutions for Intacct Financial Accounting

Regardless of company size, the tracking of assets is an important business concern. Tracking the location, quantity, condition, maintenance and depreciation of assets can be a daunting task if you're relying on spreadsheets or other manual procedures.

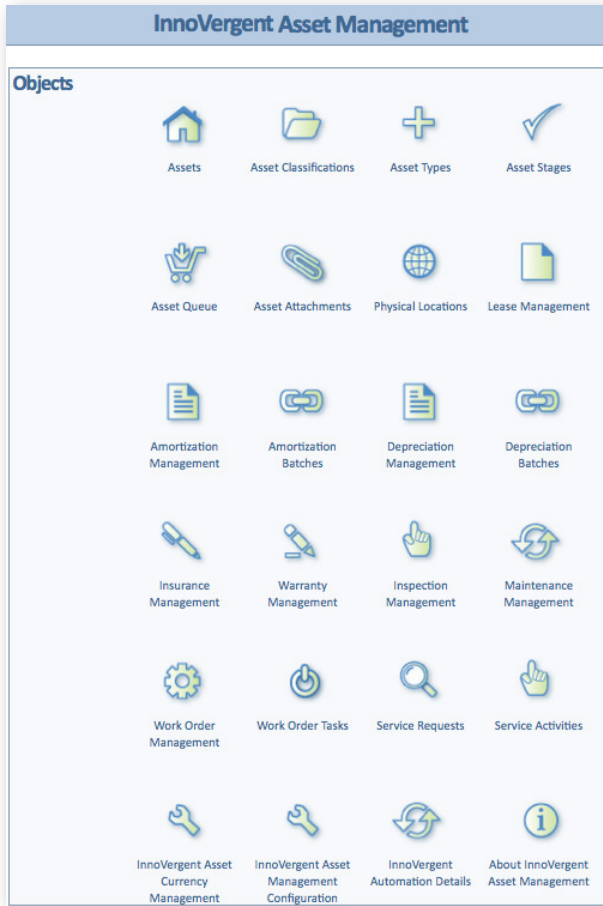

Fixed Asset Management Solution from InnoVergent automates your fixed asset management and integrates asset management with Intacct Financial Accounting.

InnoVergent's Fixed Asset Management Solution helps you take advantage of depreciation schedules as well as better manage expenses through loss prevention, improved equipment maintenance and warranty usage, and reduce unnecessary equipment purchase.

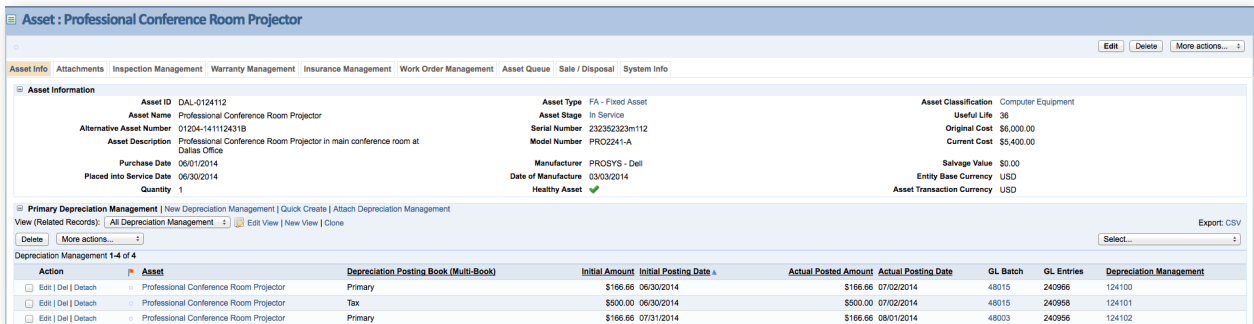

The days of manual fixed asset tracking is over. With InnoVergent's powerful Fixed Asset Management Solution, Intacct users are able to build and maintain assets throughout the asset lifecycle without dealing with the tedious tasks of passing of paper between departments, manual GL posts, and asset location tracking. Also, with InnoVergent's innovative asset queuing functionality, companies have the ability to auto-generate assets from purchase orders and vendor bills as well as define, group and relate similar assets before they are promoted to your Fixed Asset Management module.

Fixed Asset Management Solution Features

- Department, class, location, physical location, and assignment management
- Ability to post depreciation to GL
- Asset, asset types, and asset category management
- Auto-generation of assets through asset queuing
- Configurable asset, depreciation, depreciation charge, write off, write down, and disposable costs accounts
- Integration with Intacct Standard Objects (AP, GL, Users, Ad-hoc reporting)
- Insurance, warranties, and asset attachment management
- Automatic email and alert notifications
- Inspections, inspection intervals, and maintenance categories management
- Manage asset sale and disposal
- Standard reports as well as user-defined ad-hoc reporting
- Full audit trail
